BE HEALTHY FOR GOOD WITH LIFE’S SIMPLE 7

GET ACTIVE
Try to get at least 150 minutes per week of moderate exercise or 75 minutes per week of vigorous exercise (or a combination of both). Even at two or three 10-15 minute bursts of exercise can be beneficial, and all those little steps will lead to big gains in the long run.

EAT BETTER
Eat a colorful diet full of fruits, vegetables, whole grains, low-fat dairy products, poultry, fish and nuts. Try to limit sugary foods and drinks, fatty or processed meats and salt.

LOSE WEIGHT
Maintaining a healthy weight is important for your health. To lose weight, you need to eat fewer calories than you are using. Learning to balance healthy eating and physical activity can help you lose weight more easily and keep it off.

CONTROL CHOLESTEROL
Cholesterol comes from two sources: your body (which makes all the cholesterol you need) and food made from animals. Eating smart, adding color and moving more can all help lower your cholesterol.

MANAGE BLOOD PRESSURE
Blood pressure is the force of blood pushing against blood vessel walls. Sometimes the pressure in arteries is higher than it should be, a condition known as high blood pressure. Stress and poor diet have both been linked to high blood pressure, so it’s important to be well and eat smart to help positively influence your blood pressure numbers.

REDUCE BLOOD SUGAR
Blood glucose (also sugar) is an important fuel for your body. It comes from the food you eat, so it’s important to eat smart. Cut out added sugars by checking nutrition facts labels and ingredients, limiting sweets and sugary beverages, choosing simple foods over heavily processed ones and missing sweet fruits if they are in syrup. And you can move more, because moderate-intensity aerobic physical activity can also help your body respond to insulin.

STOP SMOKING
Not smoking is one of the best things you can do for your health. Smoking damages your circulatory system and increases your risk of multiple diseases, but the good news is that your lungs can begin to heal themselves as soon as you stop. Moving more can help you on your journey, since physical activity can help you manage stress.
